

ASO Improvement Strategy

StoRIZZ

Apple App Store · Short Drama & Stories

Generated: May 2026 | Based on audit + live competitor research

01 AUDIT BASELINE (FROM ASO AUDIT REPORT)

Your current ASO audit score is **51/100 (Grade C)**. The four sub-scores below show exactly where the biggest gaps are — and where improvements will have the most impact on Apple Search Ads conversion.

Critical Issue	Impact on ASA Conversion
75% negative reviews — mainly pricing complaints	↓ Lowers CVR — users check reviews before c
Title is just 'StoRIZZ' — 7 chars, no keywords	↓ Misses indexing; ASA relevance score suffer
Only 3 keywords: drama, stories, episodes	↓ Severely limits keyword match volume
No CTA in description	↓ Users bounce from product page without acti
6 screenshots only (8 allowed), no preview video	↓ Fewer creatives = lower tap-through & conve
Localization score: 10/100 — en-US only	↓ Missing es-MX, fr-FR, de-DE, ja-JP, pt-BR

02 COMPETITOR INTELLIGENCE (LIVE RESEARCH)

Five direct competitors researched from live App Store listings. Every competitor shares the same critical weakness: users feel misled by 'free' messaging and coin paywalls. **StoRIZZ's opportunity is to win on trust and transparency.**

App	Scale	Their Strength	Their Weakness — Your Opportunity
ReelShort	370M DL \$700M revenue	Times100 award, top 100 in 116 markets	Coin system rage, ads every 2 min. → Position StoRIZZ as cleaner UX
FlareFlow	10M DL in 3 months	Top 5 US, 177 countries, COL Group backed	AI-content backlash, actor removal → Lean into real human stories
NetShort	41M DL, 160K/day	High-intensity viral drama positioning	'Free' ad claims feel misleading → Transparency in your CTA wins
Shortical	10K+ episodes	Werewolf, time-travel, billionaire variety	Bait-and-switch reviews → Clear pricing in description
DramaReels	Growing	Clear drama/series focus	Less differentiated overall → Genre depth sets StoRIZZ apart

03 KEYWORD STRATEGY — FROM 3 KEYWORDS TO FULL COVERAGE

The audit found only 3 keywords in use (drama, stories, episodes). Below is a full keyword architecture across 4 tiers. Apple indexes the Name + Subtitle + 100-char keyword field — every character matters.

TIER 1 — App Name + Subtitle (highest weight)

short drama Very High	mini series Very High	drama streaming High
micro drama High	vertical drama High	drama reels High

TIER 2 — Genre Keywords (best CVR, clearest intent)

billionaire romance Very High	revenge drama series High	werewolf romance High
CEO romance series Medium	secret billionaire High	second chance love Medium

TIER 3 — Long-tail (lower CPC, faster ranking)

1 minute drama episodes Lower comp	swipe drama series app Lower comp	offline short series app Lower comp
addictive drama cliffhanger Lower comp	new drama episodes daily Lower comp	watch short dramas free Lower comp

TIER 4 — Missing opportunities (from audit)

binge High	interactive stories Medium	entertainment High
romance Very High	thriller High	TV shows Very High

Recommended 100-char Keyword Field (copy-paste ready):

romance, revenge, CEO, werewolf, billionaire, reels, swipe, binge, entertainment, thriller, series, TV, stream, interactive

Note: No repeated words from the name or subtitle. Commas only — no spaces. This covers all high-priority terms not already indexed via name/subtitle.

04 OPTIMIZED METADATA — READY TO IMPLEMENT

APP NAME

30 / 30 chars

StoRIZZ: Short Drama & Stories

■ Adds 'Short Drama' and 'Stories' — two of the highest-volume terms — directly into the indexed name field.

SUBTITLE

26 / 30 chars

Mini Series & Binge Dramas

■ Covers 'mini series', 'binge', 'dramas' without repeating any name keywords. Every word is independently indexed.

DESCRIPTION

Binge short dramas in 1-minute episodes — romance, revenge, and billionaire secrets. New stories added every day. Watch offline, no long commitments.

WHY PEOPLE LOVE STORIZZ

- Swipe-to-watch vertical drama — finish a full episode in your commute
- New episodes daily — never run out of content
- Download for offline — watch on flights, no WiFi needed
- Personalised recommendations — discover your next obsession

GENRES WAITING FOR YOU

- Billionaire romance & secret CEO stories
- Revenge arcs & comeback dramas
- Werewolf saga & fantasy love stories
- Heartbreak, second chances & emotional twists
- Suspense, betrayal & shocking cliffhangers

CLEAR & SIMPLE PRICING

Try free episodes first — no hidden charges. Premium unlocks unlimited stories ad-free. Cancel anytime from your App Store settings.

Download StoRIZZ and start watching today.

■ Key changes: (1) Pricing transparency in first fold — directly addresses the #1 negative review complaint. (2) CTA added ('Download StoRIZZ today'). (3) Genre emoji triggers emotional match faster than plain text.

05 VISUAL ASSETS — SCREENSHOTS & ICON

Current: 6 screenshots, no preview video, icon lacks genre cues. Target: 8 screenshots + preview video. Below is the recommended screenshot sequence.

	HOOK — Emotional trigger	
Frame 1	Show vertical player mid-cliffhanger. Text overlay: '1-Minute Episodes. Endless Drama.'	■ Highest-traffic entry point. User decides in 0.3s — lead with visceral emotion, not features.
	SOCIAL PROOF — Scale & freshness	
Frame 2	Content library grid. Text: '5,000+ Stories. New Episodes Daily.'	■ Abundance reduces churn anxiety. Competitors show this poorly — make it visual.
	GENRE MAP — Relevance match	
Frame 3	4 genre tiles: Billionaire, Revenge, Werewolf, Romance. Each with 1-line show title.	■ Different users land for different reasons. This frame broadens conversion across segments.
	TRUST — Transparent pricing	
Frame 4	Clean onboarding screen. Text: 'Try free. No surprises. Cancel anytime.'	■ Directly addresses 75% negative reviews. Competitors skip this — it's your conversion differentiator.
	OFFLINE — Functional benefit	
Frame 5	Download icon + airplane mode. Text: 'No WiFi? No problem. Download & watch anywhere.'	■ Unique feature vs most competitors. Appeals to commuters — core user persona.

DEEP DIVE — Show-specific scenes		
Frames 6-8	3 frames showing popular show moments with episode title + genre tag.	■ Increases time-on-page and gives users something to emotionally connect with before installing.

Icon fix: Current icon (#222222 + #FFFFFF) is consistent but lacks genre cues. Consider adding a subtle play button or drama-related visual element — a single swoosh, film frame, or stylized 'S' that evokes storytelling. Keep the dark base color, just add one recognisable entertainment signal.

06 REVIEWS & RATINGS — TURNING 75% NEGATIVE INTO A GROWTH ENGINE

Current: 4.0 rating (declining), 86 ratings, **75% negative** — all about pricing confusion. This is your most urgent ASA conversion problem. When a user sees your ad and checks reviews before installing, 3 in 4 will see a complaint. The fix is a two-track approach.

Track	What to do	Why it converts
IMMEDIATE (This Week)	Respond to every 1-2 star review mentioning pricing. Template replies change the impression for everyone: 'Thank you for trying StoRIZZ. You can try free episodes first — no card needed. If you were charged, we'd refund you.'	Visible replies change the impression for everyone. Shows you care about feedback.
DESCRIPTION FIX (This Week)	Add pricing clarity in first fold of description: 'Try free episodes — no hidden charges. Premium unlocks unlimited stories. Cancel anytime from App Store.'	Stops the complaint at source. Users who understand pricing are more likely to install.
RATING PROMPT (This Month)	In-app rating prompt after user completes their 3rd episode. 'How did you like the first episode?'	Completion is a satisfaction signal. Asks for feedback when engagement is high.
REVIEW VELOCITY (Ongoing)	Target 200+ ratings before major ASA scale-up. More ratings = more social proof.	Builds momentum and signals to the algorithm that you're a popular app.

07 LOCALIZATION — 10/100 SCORE = UNTAPPED INSTALLS

Currently only en-US. The audit flagged 5 high-value missing locales. Each locale is a separate keyword index — localizing multiplies your ASA reach without increasing bid costs.

Locale	Market	Why Priority	What to Localize
es-MX	Mexico / Latin America	Fastest-growing short drama audience. ReelShort already top-10 there.	Name, subtitle, description, keywords, screenshots
pt-BR	Brazil	Largest Portuguese market globally. High mobile usage.	Name, subtitle, description, keywords
fr-FR	France / Francophone	FlareFlow launched in 11 languages at launch. Huge market.	Name, subtitle, description
de-DE	Germany / DACH	High-LTV market. Short drama genre growing fast.	Name, subtitle, description
ja-JP	Japan	Manga culture = natural short drama audience. Very high ARPU.	Name, subtitle, description, screenshots

08 PRIORITIZED ACTION PLAN

Ordered by impact on ASA conversion rate. All metadata changes take effect within 24-72 hours of App Store Connect submission.

THIS WEEK — High Impact, Low Effort		
P1	Respond to all 1-2 star pricing reviews with empathetic, solution-focused replies	■ Immediately changes how future users perceive StoRIZZ

P2	Update App Name to 'StoRIZZ: Short Drama & Stories'	■ Instant keyword indexing improvement + ASA relevance lift
P3	Update Subtitle to 'Mini Series & Binge Dramas'	■ Adds 4 more indexed terms without repeating name keywords
P4	Add pricing transparency to first 3 lines of description	■ Addresses #1 negative review cause at source

THIS MONTH — High Impact, Medium Effort

P1	Rewrite full keyword field (use the 100-char string from Section 03)	■ Expands keyword coverage from 3 to ~15 unique terms
P2	Redesign screenshots to follow 8-frame sequence (Section 05)	■ Screenshot quality is the #1 CVR lever after keywords
P3	Add app preview video — 15-30 sec showing swipe + cliffhanger moment	■ Preview video alone can lift CVR 25-30%
P4	Add in-app rating prompt after 3rd completed episode	■ Starts growing review count toward 200+ target
P5	Begin localization for es-MX and pt-BR (highest-ROI markets)	■ Each locale = new keyword index with zero additional bid cost

THIS QUARTER — Medium Impact, Ongoing

P1	Monthly keyword refresh — check ASA search term reports for new winners	■ Keeps keyword set current with evolving search behavior
P2	Complete localization for fr-FR, de-DE, ja-JP	■ Unlocks 3 more high-ARPU markets
P3	Add In-App Events for new content drops + premium promotions	■ Free additional impressions in Today tab and search results
P4	Monitor rating trend — target 4.3+ before next major scale	■ Higher rating = Apple algorithm favors your app in rank
